

WILDLAND SEASON INFECTIOUS DISEASE PREVENTION

SELF-AWARENESS / SCREENING

- Immediately separate yourself from others
- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel

ENROUTE

- Minimize personal gear inside the cab
- Keep a supply of masks and gloves on the rig
- Do not mix crew member's PPE, store it in separate compartments
- Keep personal items within personal space
- Bring products for cleaning the cab and hotel rooms
- Provide hand sanitizer and disinfecting wipes for use

ON THE LINE

- Keep your dime, 10 ft spacing, on the fireline
- Maintain 6 ft distance during briefings and mop-up
- Wear bandana or approved facemask during suppression
- Avoid cross-contamination when eating and drinking
- Keep food and water separated by individual

WILDLAND SEASON INFECTIOUS DISEASE PREVENTION

AT BASECAMP

- Ensure physical distancing between crews
- Wear facemasks and wash hands often
- Minimize personnel moving thru camp for supplies etc.
- Wear gloves while handling equipment
- Clean equipment handled at camp
(supplies, radios after cloning)
- Limit personnel at operational briefings
(chiefs and captains only)
- Keep space during check-in and demobilization

DURING REST PERIODS

- Expect that hotels may not be available
(avoid sleeping trailers)
- Plan ahead- bring tents, cots, sleeping bags and pads
- Clean commonly used surfaces in hotel rooms
- Be aware of contact with people and surfaces in public

COMMUNICATIONS

- Face coverings and social distancing complicate communications, ensure effective sender/receiver messaging
